

CRITICAL RESULTS

Intuitive Imaging Informatics, LLC (I3) created its Critical Results management tool to address the evolving needs of radiology. When a radiologist's read makes a determination that includes a critical, urgent finding, one wants to be confident that this result is properly communicated back to the referring physician. This functionality provides radiologists and administrators with the ability to alert referring physicians of critical findings, ensuring acknowledgement and receipt of notification, while providing a log of this communication activity.

I3's Critical Results communication goes full circle:

When initiating a Critical Results alert, Radiologists can assign keywords, which provide flexibility in sorting active Critical Results communications. Also, follow up reminders can be set to prompt the Radiologist to contact Referring Physicians to be updated on actions taken as a result of the critical findings

I3's Critical Results management tool keeps you in the loop!
