

4DM: NUCLEAR CARDIOLOGY QUANTIFICATION

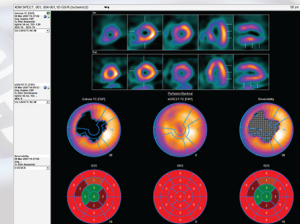

4DM: Nuclear Cardiology Quantification

Intuitive offers Corridor4DM as the integrated nuclear cardiology solution on the ImageQube PACS through a partnership with INVIA. This comprehensive solution for physicians provides cardiac quantifications such as:

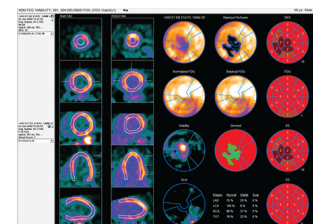

- » Ejection Fraction
- » TID
- » LV volumes
- » Semiquantitative Scores
- » SUV for FDG PET imaging
- » Regional Wall Thickening, Motion, and Time to Peak Contractility

All of these features are available in a single, configurable application.

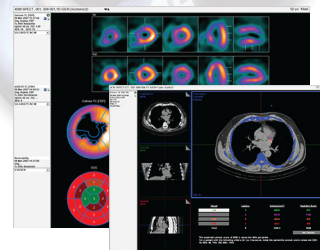

Training is included with every purchase. INVIA product specialists, all trained Nuclear Medicine Technologists, travel to your facility to train your molecular imaging professionals.

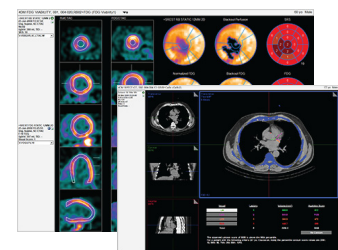

SPECT

PET

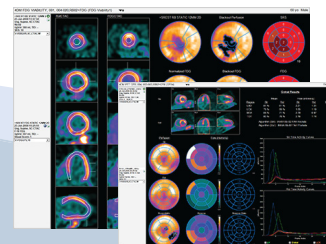

SPECT/CT

PET/CT

FEATURES:

- » SPECT (+ Blood Pool) and PET Quantification
- » Coronary Flow Reserve (CFR) Quantification
- » Calcium Scoring and CT Displays
- » Quality Assurance Measures
- » Intelligent Workflows for Greater Efficiency
- » Review Perfusion + Function
- » Multiple Review Screens
- » Clinically Validated Algorithms
- » Extensive Supported Datasets + Normals Database
